

HC-240GT/280GT Horizontal Premade Bag Weighing Filling Sealing Machine

Premade pouches horizontal packing machine is a mechanical and electrical integration product, widely used in the veterinary medicine industry, agricultural chemical industry, daily chemical industry, pharmaceutical industry, health products industry, food industry, etc. Packaging material can be used for paper plastic composite, plastic composite, aluminum-plastic composite, PE composite, and other packaging materials, packaging material loss is low, the use of pre-made packaging pouches. This machine is an automatic premade pouch packing machine, with wide compatibility, easy to change the pouches type, and specification adjustment.

Suitable for packaging of materials in different states (such as: powder; Particle; liquid; Paste; Solids, etc.).

According to different materials, different discharging devices are used.

Suitable for a variety of pouches types (such as three-sided seal; Four-sided seal; Stand by pouches; Self-supporting zipper pouches; Special-shaped pouches, etc.) according to different pouches types, different pouches taking methods are adopted (such as: up pouches taking; Take down the pouches, paging pouches, etc.).

Powder: flour, seasoning, milk powder, glucose, chemical seasoning, pesticide, fertilizer.

Technical specifications

Model	HC-240GT	HC-280GT
Pouch Type	Three-side seal/four-side seal/stand-up pouch/zipper bag	
Min. Pouch Size	120x130mm	150x180mm
Max. Pouch Size	240x350mm	280x400mm
Packing Speed	<60 bags per minute	<60 bags per minute
Packing Range	≤ 2000ml	
Packing Station	2	
Power	4kw	
Voltage	380V 3 phase 50Hz	
Air Consumption	400L/min	
Air Pressure	0.7MPa	
Machine Weight	1500kg	1800kg
Machine Dimension	3255x1500x1420mm	3657x2160x1420mm
