

Check Weigher-120

Check Weigher 120 is a sophisticated weighing system having its unique design and precise weight control in the standard online weight checking of individual products such as Vial, Bottles, Pouch, Carton, Various pack or any stable object in the field of Pharma, Food, Dairy, Cosmetics, Pesticides and many other Consumer Goods to get detail of weighing correctness online.

Machine Structure majority component is made from Stainless Steel 304 material and supported by latest automation Technology for Electronic components. Machine with large Colour Touch Screen Display for excellent visibility with simple user friendly operation with Recipe Storage for multiple products.

Characteristics:

- Single sensor technology to detect any kind of load variation on the fly.
- Compact size requires Minimum space on the production floor.
- Smoothly driven conveyor gives better performance of machine.
- USB base Printer Interface (Epson LX300+ Series).
- Underweight or Overweight Rejection.
- Tri-color LED Tower Light for operational overview.
- Pusher or Air Blow type Rejection System.
- 99 Product Recipe Storage.

Technical Specifications:

- Weighing Range: 2g. to 500g. or 10g. to 100g.
- Accuracy : ± 0.3 Gram
- Resolution : 0.2g
- Display : 7 inch Colour Touch Screen Display
- Speed : 120 PPM
- Conveyor Speed : Adjustable through AC Frequency Drive

- Power Requirement : Single Phase 220 VAC/50Hz
- Pneumatic Requirement : 6kgs/cm² for Rejection System
