

Customized JTJ-3 JTJ-III ZJT-III Semi Auto Capsule Filling Machine

JTJ-3 Semi-Automatic Capsule Filling Machine Encapsulation Equipment Manufacturers for Pellets Pill Granule for Capsule Filling is suitable for filling capsules in size 000#, 00#, 0#, 1#, 2#, 3#, 4#, 5# and imported capsules. Adopts mutual control of electrical equipment and air control device and equip electrical automatic counting device to finish the process of positioning, separating, filling and locking capsules. It can improve productivity and reduce the labor.

The whole process meets GMP standard. The machine can fulfill smooth operation, precise filling dosage, innovative structure and convenient operation. It is an ideal machine for filling capsules for modern pharma industry currently.

Feature

1. Easy to operate, increase production and reduce manual labor fatigue
2. Up to 40,000 Capsules per Hour
3. Replacement of mould 5-8 minutes.
4. Size #000 to #5 Compatible, comes with a set of plates and tooling of your choice.

Technical specification

Model	JTJ-3 JTJ-III ZJT-III
Max Output	10000-40000 pcs/hour
Scope of application	Power, Pellet, Granule
Power	3.4KW
Voltage	110/220V/380V 50/60HZ
Weight	750KG
Dimension	1350×780×1635mm
