

SA-S Semi Automatic Sack Filling Machine

The SA-S Semi Automatic Packaging Machine is specifically engineered for low-capacity production facilities. Offering operational convenience, this Semi Automatic Packaging Machine provides precise weighing capabilities for sack filling operations. Weighing accuracy depends on parameters such as the physical properties and density of the product. Packaging speed varies based on operator performance and the type of material being processed. All surfaces of the machine that come into contact with the product are manufactured from AISI 304 stainless steel, meeting food safety and durability standards. This feature ensures that the SA-S Semi Automatic Packaging Machine is a hygienic and long-lasting solution.

Technical Specifications:

Width	2280mm
Length	3950mm
Height	4050mm
Weight	850kg
Production Speed (Number/Min)	18
Power Consumption	2 Kw
Operating Voltage	380V 3 Phase 50Hz
Air Consumption	30 Lt/Dakika - Minute
