

ZL520 Mixed Products Soft Bag Vertical Forming Filling Sealing Packaging Machine

This unit machine is special design for packaging liquid and solid mixture product into plastic bag. The machine have the function of automatic bag forming, Solid product weighing, Liquid product measuring and filling. With optional function of exhausting the air inside the bag and then sealing the bag. The machine also have color ribbon for date printer for coding of expiry date and production date.

Technical Parameters:

- Weighing Range: 1000-5000g
- Packaging Speed: 20-40 bags/min
- Bag size: (80-460)*(100-350) mm (L*W)
- Compressed air requirement: 0.6Mpa 0.65m³/min
- Reel outer diameter: 400mm
- Core inner diameter: 75mm
- Machine weight: 800kg
- Power source: 5.5kW 380V \pm 10% 50Hz
