

T300B Automatic Transparent Film Three-dimensional Packaging Machine

Features:

- This machine is made of stainless steel and complies with GMP; PLC control system, human-machine interface operation, can adjust the number of bundled items at will; 30-80 (mm) wide film belts can be selected at will to achieve maximum material and energy saving.
- This machine has stable operation, simple operation and convenient maintenance. Products of different packaging specifications can be replaced within 20 minutes. It can be used alone or in conjunction with front-end equipment (cartoning machine, inkjet printer, weighing machine, etc.). It is the preferred equipment in the industry to replace medium box packaging.

Parameters

Production speed	0-45 packets/min
Packaging range	Maximum: L300xW200xH85mm
	Minimum: L60xW50xH20mm
Power	4.5kW
Operating voltage	380v/50Hz
Air pressure	0.6MPa
Equipment weight	About 700Kg
Equipment size	L2100mmxW930mmxH1700mm
Conveying size	L1150mm xW250mmxH750mm
