

VS-600 Commercial High-Efficiency Food Preservation Packaging Machine

The VS-600 external vacuum sealer is a device used for packaging food, pharmaceuticals, and other products by removing air from the packaging bag to extend the shelf life of items. Suitable for both commercial and home use, this device effectively prevents oxidation, moisture, and contamination, ensuring long-term preservation and quality during storage and transportation.

Product Description

Advantage

- **Efficient Vacuum Extraction:** Equipped with a powerful vacuum pump, the external vacuum sealer quickly and effectively removes air from the bag, ensuring airtight sealing and preservation.
- **Fully Automatic Operation:** The intelligent control system supports one-touch operation, simplifying the packaging process and catering to various user needs.
- **Multi-Functional Design:** Adjustable vacuum levels and sealing times accommodate different types of products.
- **Durable Materials:** Made from high-quality materials, the external vacuum sealer features a robust construction for long-term reliable operation.
- **Energy-Efficient and Eco-Friendly:** The efficient design reduces energy consumption and meets environmental standards

Description

The external vacuum packaging machine is a highly effective tool for sealing a range of products in airtight bags. By extracting air from the packaging, it helps prevent spoilage, contamination, and oxidation, significantly extending product shelf life. The machine's external vacuum design makes

it particularly efficient for bulk packaging and high-throughput environments. It's a must-have for businesses that require fast, consistent, and reliable vacuum packaging with a compact footprint.

Technical Parameters

Model	VS-600
Voltage	110/220V 50-60Hz
Pump Power	0.9kw
Pump Capacity	706.2 cft/h(20m ³ /h)
Sealing Length	23.6 inch(600mm)
Sealing Width	0.4 inch(10mm)
Dimension	25.2 in × 18.9 in × 39.8 inch
	(640 × 480 × 1010 mm)
Weight	≈176.4 lb(≈80 kgs)
Certification	CE ISO
