

MIC-15C Grab Case Packer

In today's fast-paced manufacturing industry, automated packaging solutions play a crucial role in improving efficiency and reducing labor costs. MIC Machinery introduces the MIC-15C Grab Case Packer, a high-performance auto case packer designed to handle up to 17 cartons per minute with precision and reliability. This box packer machine is ideal for industries requiring fast, consistent, and automated case packing.

Key Features of the MIC-15C Case Packer

The MIC-15C case packer is engineered with advanced technology to ensure smooth and efficient case packing.

1. High-Speed Performance – Packs up to 17 cartons per minute, increasing productivity.
2. Grab and Place Mechanism – Ensures precise product placement into cases.
3. Fully Automatic Operation – Reduces manual labor and enhances efficiency.
4. Versatile Case Handling – Supports various box and carton sizes.
5. Compact and Durable Design – Built for long-term industrial use.
6. User-Friendly Touchscreen Interface – Easy to operate with minimal training.

Advantages of the MIC-15C Box Packer Machine

1. Boosts Production Efficiency

The MIC-15C auto case packer is designed for high-speed operation, helping manufacturers increase their output while maintaining precision.

2. Reliable and Consistent Packaging

With its grab and place system, this box packer machine ensures each product is securely placed into the cartons, reducing errors and product damage.

3. Cost-Effective Automation

By automating the case packing process, the MIC-15C case packer helps businesses reduce labor costs and improve overall operational efficiency.

4. Versatility for Various Industries

This auto case packer is suitable for food, beverage, pharmaceutical, cosmetics, and industrial packaging applications.

5. Space-Saving and Easy Maintenance

The MIC-15C box packer machine is compact and integrates seamlessly into existing production lines, while its accessible design simplifies maintenance.

Technical Parameter

Carton size	L260-535* W260-420*H130-330
Speed	17 carton/min(according to the carton size)
Dimension	1950*1500*1450mm
Power supply	220V;50Hz
Table high	Min 600mm; Max 720mm
Tape width	45~72mm
Weight	400kg
