

SED-150CH Dry Powder Horizontal Ribbon Powder Mixing Machine For Pharmaceutical

Groove Type mixer is widely used to mix powder or moisture materials and make the different proportion of main and supplementary materials mixed evenly.

All the parts touched with materials are made of stainless steel. The clearance between blades and vessel body is small so that there is no dead corner during mixing.

Sealed devices are installed at the two ends of mixing shaft to prevent the leakage of materials. It is widely used in the industries of pharmacy, chemical, food, etc.

Feature

1. It is used to mix the dry-powder, granular materials with good liquidity.
2. It consists of two asymmetric cylinders. The materials can flow as vertical and horizontal direction. The mixing uniformity will be above 99%.
3. It adopts vacuum feeding under sealing state. There's no driving structure inside and be clean, no dead corner in according with GMP standard.

Main Parameter

Volume (L)	100
Power of agitation motor (kw)	2.2
Rotation speed of agitation (r/min)	24
Power of Inclined motor (kw)	0.55
Input(kgs)	50
Weight (kg)	300
Overall dimensions (mm)	1400×500×1000
