

Horizontal auto packaging machine DC-228-150

Features:

DC-228 adopts microcomputer control (PLC) with high production rate, making pouches accurately and product measuring correctly. Filling types can be selective, such as auger filler, measuring pumps filler, piston filler, etc. which make the machine fit for various products. With different sealing types and multi-layer protection, the products can be kept for longer shelf time. Procession of packaging is visible and operation is user-friendly. Packaging size can be conveniently and quickly adjusted. With perfect design and stable running of the machine, the appearance of the pouch is neater and smoother.

SPECIFICATION:

Length	Width	Speed	Volume	Consumption power	Weight
100-200 mm	70-150 mm	40-80 pec/min	5-280 ml	3.5kw/ 380V/ 3phases	850KG

Suitable material:

Various powder and granule flavorings, powder pesticides, viscous flavorings, ketchup, cosmetics (shampoo or lotion), Chinese medicine, ointments and pesticide etc.
