

VCX-1 Single Head Capping Machine

VCX-1 Single Head Capping Machine is used for various configuration containers, irregular containers. It can suitable for three-revolving lids and special lids. The max capping speed can reach 2500 bottles/hour.

Features:

1. This machine has one mechanical hands, dispatches caps in high speed with no inverse cap.
2. It can be divided into scrape capping and grasp capping according to different caps.
3. Supply cap machine and mechanical hands working with synchronization, when cap tighten finished, bottle and cap relative stop.
4. Clutch separate, bottle and cap are not injured.

Technique Parameter:

power supply	AC 220V ; 50Hz
power	1.5kw
pneumatic (air-operated) source	0.6MPa clean and stable compressed air
suitable bottle diameter	Φ40mm~Φ100mm
suitable bottle height	60mm~230mm
suitable lids diameter	Φ20mm~Φ70mm (according to customer special requirements)
suitable lids height	15mm~30mm (or according to clients' special requirements)
production capacity	2500bottles/hour
weight	580kg
machine dimension (L×W×H)	2000mm×1000mm×1600mm
