

RS - according to automatic semi-fluid packaging machine

Machine features: back seal, three edge sealing, and four edge sealing packaging form. Packaging operation data and adjust visual display on the screen, direct manipulation, assembly photoelectric control device to ensure complete packaging design, automatic bag making, measuring, filling, sealing, cutting, counting, printing batch number, shell and material contact parts using stainless steel material.

Suitable material: shampoo, conditioner, lotion, soy sauce, cough syrup, chemicals, beverages, wine, sauces, matching

Equipment: all kinds of liquid code printer (ribbon)

Technical parameters:

Model	RS-S100
Made bag length in mm	50-260
Made from the bag of mm wide	25-130
Packaging film width in mm	60-260
MI packing capacity	20-200
Production efficiency	30-60
Power kw	1.6
Air source pa	0.65
Gas consumption l/min	150
Boundary dimension mm	800*1500*1900
Total weight kg	300
