Automatic Particle Packaging Line

Automatic granule filling machine production line

This machine is suitable for the quantitative filling of various kinds of granule materials, small chip materials, irregular materials, and the sealing of screw cap. It is widely used in food, seed, medicine, chemical industry and other industries. For example: chicken essence, monosodium glutamate, coffee, tea, seeds, dried fruit, Fried goods, etc

Main features:

- With four - bucket electronic weighing technology, the filling speed is fast and the precision is high
- Use a tank or bottle container, use a double cylinder to coordinate a number of photoelectric, automatic bottle positioning container, no bottle, no bottle
- Automatic cover, screw cap, the whole machine structure layout is reasonable, change the packaging breed, clean sanitation and for convenience

Technical parameters:

Measurement: weighing four bucket electronic scale

Packing weight: 30-2000 g

Accuracy error: + / + (0.2%-0.5%)

Packing speed: 20-60 bags/min

Machine weight: 600kg

Power: AC380V 50-60hz /3.5kw

Unit volume: (L)5000 x (W)1000 x (H)2200mm
