

Automatic Salt Filling Machine for Bottle

Automatic Salt Filling Machine, Granular Packaging Machine for bottle is widely used for all kinds of granular, salt filling, Small pieces of material, Irregular materials packing, filling, it is used for food seed, medical and chemical production industries.

Main features:

- With the electronic weighing technique, the packaging error is small and the accuracy is high.
- Weighing by eight electronic scales, the-scales are opened automatically when the container is in place.
- The bottle can be packed in a jar or a bottle shaped container, and an automatic feeding tank system can be realized. No bottle No Filling
- The structure and layout of the whole machine are reasonable, and it is convenient to change the material, easy to clean it.
- Stable and Reliable for long time running.

Technique Parameter:

Measurement mode	electron steelyard
Filling range	30-2000g
Accuracy tolerance	$\pm(0.2\%-0.5\%)$
Packing speed	40-80bags/min
Weight of machine	600kg
Power supply	AC380V 50-60Hz/2.0kw
Machine dimensions	(L)2400×(W)1180×(H)2600mm
Container size	cylindrical chamber $\phi 20-180\text{mm}$ (h)50—350mm
