

FH-S350 Paging Conveyor

Paging machine, also known as sorting machine, high-speed centrifuge plastic bags. Can be used together to spurt the code machine and laser machine, can also be used independently, after use will greatly improve the working speed, saving operation time, save the human, maximum limit reduces the cost of production.

Paging: high speed and high precision frequency conversion and infinitely adjustable, high speed automatic paging 10-500 / minute, can greatly improve production efficiency;

Structural design is reasonable, simple and easy to replace the vulnerability, can reduce the maintenance cost;

Optional accessories: automatic feeder, paging machines, separate countdown signal source.

Technical Parameters:

Model	FH-S350
Boundary dimension	Long 1400 & # 215;350 the & # 215;A height of 700
Weight	30Kg
Rated voltage	AC220V/50Hz
Power	90W
Speed	0~60m/min
Length of product	60-500 - mm // Adjustable Adjustable
Width of product	60-350 - mm // Adjustable Adjustable
