

Semi Powder Filling Machine

Semi Powder Filling Machine is used to fill variety of product like granules, powder etc in bottle and Pouch. It basically works on Auger base to fill powder in bottle and Pouch.

SALIENT FEATURES:

- » Compact design, fast output with weighing system.
- » Digital display panel.
- » Contact parts are in S.S. 304.
- » Auto tare system & manual setting for weight.
- » Flexible pouch holder for different size of pouch.
- » Foot operated function for avoid wastage.
- » Wide packing range in single compact machine.
- » Accuracy 2% + or –
- » Power consumption-up to 2hp
- » Continues rotation of adjustable stirrer inside the hopper de-aerates to maintain uniform bulk density of the product.

TECHNICAL SPECIFICATION:

APPLICATION	Any type of powder/granules.
CONTACT PARTS	S.S.304 other part M.S. and hardcom m.s.
OUTPUT	6 -20 Fills/minute. (Depending upon the material characteristic, and Filling Volume).
HOPPER CAPACITY	25Kgs. (For 1 Kg.) and 50Kgs. (For 5 Kg.)
FILLING VOLUME	up to 1 k.g. (depends upon volume and density of material)
LOAD CELL	6Kgs. (For 1 Kg.) and 10Kgs. (For 5 Kg.)
POWER	Three phase 440v. 1 HP
