

JC-350 Bigger Boxes Cellophane Wrapping Machine

The JC-350 Cellophane Wrapping Machine automatic feed and count, equip with micro air pump to make film falling offer. It can wrap the small-sized boxes such as medicine box, health protection box, nutriment, food, VCD/CD/DVD, magnetic tape, playing cards and cigarette box etc. It is an ideal box type overwrapping machine. It can combine with the automatic boxing machine and codes praying machine to manufacture.

Description:

The Wrapping size of bt-350 Cellophane Wrapping Machine is much larger than that of bt-250, so it can be used to pack even larger products. Its principle of operation is mechanical linkage structure, which relies on a series of cams driving each connecting rod and working parts. By applying the principle of body wrapping and adopting the multi-function digital display frequency conversion programmable control design technology, the functions of heat sealing, shaping, temperature automatic adjustment and fault emergency stop are realized.

This machine is a kind of intelligent packing equipment integrating light, machine, electricity, gas and instrument, which has the characteristics of compact structure, beautiful shape, small size, light weight, ultra-quiet, good effect of energy saving and material saving, advanced technology and so on.

Technical Parameters:

Model	JC-350C
Package size	(60-280)x(40-140)x(30-60)mm
Capacity	30-50packs/min
Voltage	220V, 50hz
Motor power	0.75kw
Electric heating power	4kw
Overall dimension	2600mm×960mm×1600mm
N.weight	1000kg
