

Unscrambler Filler Capper Sealer

This unscrambler filler capper sealer is mainly designed for the unscrambling, filling, capping and adhesive labeling of plastic bottles. And its main parts are unscrambler, filling machine, automatic capping machine, and adhesive labeler.

Features:

1. Stable performance and strong anti-disturbance capacity.
2. Controlled by microcomputer, this machine can stop filling, capping, and labeling if there are no bottles in the machine.
3. This unscrambler filler capper sealer can automatically finish all operation once workers input data into the PLC.
4. With many detachable parts, it is easy and convenient to maintain and repair.

Main Parameters:

Production Capacity	3000~6000 bottle/hour
Measurement Accuracy	+ -0. 1%
Rate of Cap Screwing	≥99%
Cover Rate	≥99%
Sticker Rate	≥99%
Electric Supply	380V/50hz, 3phase
Power	4. 5kw
Size	4000×800×1500mm
