

JR5D30D Twist-off Cap Vacuum Capping Machine

The equipment is suitable for sorts of shapes and specifications of glass bottle steam exhausting and sealing. It is equipped with frequency converter, steam spray exhausting and mechanical sealing device for complete function and high automation. It is used to vacuum seam for sorts of three or four screw cap of seasoning, vegetable, bean curd, juice and jam etc.

JR5D30BD Twist-off Caps Vacuum Capper is an entire stainless steel type after two generations of improvements. Good operational performance, and easy to operate. With accuracy automatic control by PLC..

Main technical parameters

- Capacity: 80-150B/min Free Regulation Bottle And Cap
- Closure Types: Three twist cover, Four twist cover, Six twist cover & Pressing twist cover
- Cap/Jar Diameter: $\Phi 30$ - $\Phi 90$ mm
- Bottle/Jar Diameter: $\Phi 30$ - $\Phi 100$ mm
- Bottle Height: 65-260mm
- Motor Power: 3.12kw
- Steam Consumption: 180-230kg/h
- Steam Pressure: ≤ 0.4 MPa
- Max. Vacuum Degree: 67kPa(502mmHg)
- Weight: 1100kg
- Outer Dimension (Length \times Width \times High): 3000 \times 1100 \times 2000mm
