

NJY-100C/200C/300C Hard Capsule Liquid Filling Machine

NJY-100C/300C/600C series hard capsule liquid filling machine is an equipment designed and produced by our company independently, which can complete filling (solution, suspension, micro-emulsion) in the hard capsule. Ceramic pump liquid feeding mode, servo motor control loading system, ensure the loading difference, accurate measurement, optical fiber detection, lack of glue without liquid, automatic elimination function.

This machine adopts stepless frequency conversion speed regulation, which is convenient and intuitive to operate. As a new and convenient way of dosing and filling concept in the new century, this machine is the latest filling equipment developed for high-end products in the pharmaceutical food, health care products and other industries.

Specifications:

Model	NJY-100C	NJY-300C	NJY-300C
Production capacity	100	300	600
Fill in the material	An oily liquid, solution, suspension, or paste		
Die number	2	6	12
Can capsule filling type	00#-4#	00#-4#	00#-4#
Capsule on probability	0.4-0.6Mpa	0.4-0.6Mpa	0.4-0.6Mpa
The liquid filling quantity accuracy	±2%	±2%	±2%
The power supply	380V50Hz	380V50Hz	380V50Hz
The total power	3.5KW	5KW	6KW
The host weight	600Kg	750Kg	1200Kg
Size of the host	700x800x1700mm	860x960x1800mm	960x1100x1800mm
