

ST-TB-A Automatic Sleeve Labeling Machine

Sunter Machinery offers efficient automatic sleeve labeling machine to streamline your production line and reduce downtime, saving you time and money. Our complete production line equipment is built to withstand the rigorous demands of today's packaging lines. Optimized automatic label applicator machines have the power to significantly reduce your downtime while increasing production, giving you an advantage over your competition.

Labeling is one of the most critical components in a bottling line. A customer's perception of the quality of a product is directly related to the quality of the label on that product. Labelers must therefore be precise to show quality and also flexible to meet changing regulatory demands. Inline Filling Systems offers a host of labeling machines for the most simple, low cost, semi manual applications to the most demanding high speed, state-of-the-art applications.

Technical Parameters:

Model	ST-TB-A
Power	3KW
Voltage	380V
Production capacity	2000-3000B/H
Dimension	2000×1200×2300mm
Applicable bottle diameter	Φ28mm-Φ125mm
Applicable label length	30mm-250mm
Applicable label thickness	0.03mm-0.13mm
Applicable paper tube inner diameter	5"-10"(Free Adjustment)
