

## Sachet Packaging - KPM 060

The rectangular shaped bags as 'sachet type' (that are glued in their four sides) are produced in the machine which has the property of multiline production. Depending on the size of the package, it can work 10 lined. Its capacity can reach 500 pieces/min and it can handle high capacity of production power with one machine. With proper dosaging unit, it can pack different products such as powder, granulated, liquid and wet wipes.

### Technical Details:

Capacity	Max 40-45 circuit/min
Package Height	Max 150 mm
Bobin Center Point Diameter	76 mm
Bobin Diameter	500 mm
dosing types	Liquid
Installed Electricity Power	8 kw
Average Electricity Power	4 kw
Pressured Air Consumption	6 bar 200NI/min.
Package Material	PE laminated Aluminum foil
