

Ultrasound Toothpaste Soft Tube Filling and Sealing Machine ALS-AFS

Ultrasonic Tube Filling and Sealing Machine widely used for filling, sealing and batch No. Printing of products packaged by aluminum tubes in cosmetics, toothpastes, medical ointments, food, shoe polishes, adhesives, etc.

Features:

- 1) Manual tube feeding, manual color code aligning, automatic tube discharging
- 2) Hot air inner heating, hot air heating from tube inner wall, no damage to tube surface tissues, beautiful sealing, especially suitable for sealing full-plastic packaging tubes
- 3) Automatically adjusted filling volume, no filling in case of no tube, PLC control, electrical buttons operation
- 4) Touch Screen (optional)
- 5) Irregular shape sealing (optional)
- 6) Wire drawing preventing or leakage preventing filling head(optional)
- 7) Storage barrel liquid level control and alarming system, automatic feeding (optional)
- 8) Provided with mixing storage barrel (optional)
- 9) Provided with heating storage barrel (optional)
- 10) Double used filling of liquid and ointment material

Technical Parameter:

Tube material	Plastic tube, Multiple tube
Power	2KW
Power supply	380V,50Hz,3Phase
Tube diameter	Φ15—φ50mm (customizable)
Tube length	30—250mm (customizable)
Filling volume	50-250ml (match your products)
Filling accuracy	≤±1%
Product capacity	20—30pcs/min (adjustable)
