

L45 Small Automatic Tube Filling Machine.

This L45 small automatic tube filling machine is used for the metal and aluminum tube filling and sealing. It has been widely used in pharmaceutical, cosmetics, chemical, adhesive and other industries, the main materials such as paste, ointment, creams, pigments, adhesives, AB glue, epoxy glue, hair dye, shoe polish, toothpaste, silicone etc., are all applicable.

Working process:

The tubes are put into the molds automatically-benchmarking-filling-4 times folds sealing(Flatten-bend the bottom 180°-clamp the bend part-bend 180°again-clamp the bend part again-bend the bottom 180° at the opposite direction-clamp again)-then output finished tubes.

Features:

1. Adopt PLC to control, touch screen or control panel for option, simple operation, clear at a glance, saving time and high efficiency.
2. The tube mold is customized according to the customer's tube sample, it is simple to change the mould for different diameter of tubes. A machine can be used for multiple purposes.
3. High accuracy for the filling and also have the feature of anti-drip.
4. Professional custom sealing method based on customer requirements, sealing is firm, pretty and neat.
5. This machine has stable performance and work without any noise and pollution.
6. The machine is made of high-quality 314 or 316 stainless steels. The parts which need to clean are made of quick-change device that is removable and convenient for washing.

Application and sample show:

There are different folding sealing ways, just based on customer's preferences. Aluminum tube filling and sealing machine is popular among the different industries. The sealing effect is beautiful and neat.

Parameter

Weight	800 Kg
Dimension	1950*800*1850mm
Power	220V/50Hz
Motor	2.2 Kw
Filling Quantity	3-20ml, 15-75ml, 75-250ml
Capacity	40-45 tpm
