

FFA-Y Series Infusion Bag (bottle) Packing Machine

FFA-Y Series up feeding film packing machine is specialized on the medical industry, used for the soft articles such as infusion bag, infusion bottles, etc. This machine adopts multiple belt convey feeding, photoelectrical detection, auto arrangement, distance control to distribute, avoids the manual feeding and inaccurate article position by the traditional forks. It could connect with the whole production line, in stable operation and high efficiency, and all the designs meet the GMP requirements. Correlation photoelectrical detestation effectively solves the problem of the tracking on the liquid specular reflection. The machine will stop automatically when the product is out of the position.

Packing material: the laminated film, such as OPP/CPP.

Options: date coding machine, film recovery system, auto feeding system, alcohol spray system, label sticker and so on.

Technical Parameters:

Packing size (mm)	L(100-450)*W(50-150)*H (5-65)
Packing speed	30-160 packs/min
Packing film	PET/PE PET/AL/PE OPP/PE OPP/CPP
Diameter of inner bore	φ75mm
Packing film thickness	0.04-0.12mm
Packing film width	According to the product
The total power	4KW,220V
The dimension & weight	5000*1100*1500(mm);1000KG
The feeding conveyor size	2620*500*800m (mm)
Application	100ml、250ml、500ml、1000ml
