

## Blister packaging machine DPP260K2

Multi-packing machine - Blister machine DPP260K2 is a compact processing line. With the help of medicines packaged into blisters, followed by coating them perforations and output data.

### Characteristics

1. This Blister Packaging Machine can be packed separately to accommodate a lift having a 2.2m width, and delivered to the divided purification workshop.
2. It is suitable for plastic thermoforming and aluminum cold forming blister packaging. Adopts positioning formats for straightforward format changeover.
3. Add an optional perforation station, to separate the perforation from the embossing station. Conventionally, perforation and embossing remain in one station, but this will influence the clarity of each.
4. Separation of drive and operating zones are in compliance with pharmaceutical GMP requirements.
5. Material drag system adopts a precise servo motor to achieve stable, accurate running allowing blister length to be set freely.
6. This machine can be custom-built to produce plastic thermoformed trays with maximum forming depth reaching 50mm.

## Technical Parameters

<b>Model</b>	<b>DPP260K2</b>
Max. Speed:	alu/alu 40 punches/min.
	alu/pvc 70 punches/min.
Max. Output:	280 blisters/min. (alu/pvc blister size 57×80mm)
Max. Forming Area:	245×152mm
Max Forming Depth:	12mm
Material:	Max. width 260mm
Machine Power:	9.6kw
Machine Dimension:	4 stations: 4200×740×1700mm
	5 stations: 4450×740×1700mm
Machine Weight:	4 stations: 1800kg
	5 stations: 1950kg
