

NJP-6000 Automatic Capsule Filling Machine

Adopt Utility model patent, whole spiel style pellet device, well filling effect, high output. Easy to clean and operation. Full automatic cylinder can assist capsule discharging in discharge station, which will not break the capsule .No dust, safer and reliable.

Main Technical Data

Model	NJP-6000
No.of die orifice	48
Max output(capsule/hour)	360 000
Vacuum	-0.08~-0.04 Mpa
Capsule number	00#-5#; (safety A,B)
Filling percentage	≥99.9%
Filling difference	<±4
Idle load noise dB(A)	<75
Power	380V 50HZ 15KW
Size L*W*H(MM)	1950×1550×2150
Weight (kg)	4000
*Data printing function, pellet device, dry vacuum pump (for your choice).	
Re: No additional information noted if there is any changed caused by the technical development.
