

Small Mixer Powder Mixing Machine V-30

Small V Mixer Machine adopts the principle of gravity diffusion to mix, and the pressure feed to the material is small, and it will not shear and pulverize the material. The cylinder body is made of high-quality stainless steel, and the inner and outer walls are polished. There is no pollution to the material during the mixing process, low power consumption, and easy cleaning.

Technical Parameters:

- Model No.: V-30
- Application: Medicine Processing, Chemicals Processing, Food Processing, Powder
- Max. Loading Volume (L): 18
- Dimension(L*W*H)(mm): 1000*600*1000
- Weight (KG): 100
