

## *YZ38/70 Automatic Shaped Bottle Vacuum Sealing Machine*

### **Technical performance:**

This machine has good sealing quality, with simple and compact structure. Operation and maintenance is very convenient. Other advantages of the equipment are small size, light weight and low sealing noise. Only by replacing a few parts, it can seal both small and big size cans. Widely used in sealing pop cans, paper cans, plastic cans, metal cans and glass cans, it is the ideal sealing machine for small and medium sized drink factories, cola, herbal tea factory, food factory, Kimchi factory, canning factory, canning manufactures, chemical plants, pharmaceutical factory, health care products company.

### **Technical parameters:**

- ◆ Application: auto exhaust rotary sealing joint for shaped glass bottle used in condiments, canned food, beverage, wine, etc.
- ◆ Production capacity: 40 bottles/min
- ◆ Meet the cap:  $\phi 38$ - $\phi 82$  mm
- ◆ Meet the bottle height: 30-180 mm
- ◆ Bottle vacuum:  $\geq 35$  kPa
- ◆ Tightening torque moments: 3-10 Nm
- ◆ Power: 0.55 KW
- ◆ Dimension: 1300×660×1500 mm
- ◆ Weight: 400 kg
