Automatic Can Sealing Machine

Features

1. Servo motor is used to drive the turntable, which has the characteristics of simple structure, stable operation and low noise;
2. One-key startup, the turntable will automatically reset after booting to ensure the normal operation of production;
3. Jammed tank shutdown alarm function: effectively avoid mechanical structure damage caused by jammed tank;
4. One-button reset function of the turntable: After the jam problem is eliminated, one-button reset can be done, which is convenient and quick;
5. One-key setting of turntable alignment patented invention: when changing the mold turntable, turn the turntable to make it fit the sealing position, and the one-key setting can be automatically memorized, intelligent and efficient, avoiding the tedious manual tightening and fine-tuning of the screw after changing the mold step.
6. The production capacity is 35 cans per minute and the degree of automation is high, which saves labor costs and is suitable for the equipment of the can sealing production line

Technical Details

Bottle height	30-300mm
Cap Diameter	18-70mm,can be customized base on product
Botle Diameter	20-160mm,can be customized base on product
Working speed	40-60 bottles / minute (depending on bottle and cap size and shape)
Working voltage	AC220V/110V 50- 60HZ
Wokingn pressure	0.4-0.6MPa
Dimension	1930x740x1600mm
Packing size	2000x820x1760mm
Weight	300KG
