

## Filling and Capping Machine RFC-201

### Features

1. Easy to install, simple to operate and require minimum maintenance for maximum performance and long machine lifetime
2. Integrated digital control with PLC and Touch Screen controls for easy operation. All activities are controlled by high technology Panasonic servo system
3. Protected with safety shield meet strict safety restriction
4. Sturdy conveyor system driven by high quality motor. Adjustable conveyor guide rails to accommodate with different products
5. Anti-dripping design to enable the clean conveyor surface and perfect finished product
6. No bottle-no fill system
7. Bottle jammed detection
8. Positioned by star wheel. It will automatic stop when no bottle or position is not accurately
9. Fully adjustable for different bottle with different star wheel and capping head
10. Adjustable electronic torque values to eliminate damage to caps and reduce insert wear

### Specifications

Processing	Filling+capping
Control	PLC+ Touch Screen
Filling nozzles	1/2/4/6
Machinery Capacity	5-35 Bottles/min
Filling volume	5ml-30ml
Filling Material	Beer, Milk, Water, Oil, Juice, ethyl alcohol
Voltage	220V 50-60Hz
Dimension(L*W*H)	2000mm*1500mm*1900mm
