

Automatic 8 Heads Gear Pump Liquid Filler FG-585S

FG-585S High speed lubricant filler is suitable for lubricant oil filling requirement with massive filling volume from 1 liter to 5 liter. Controlled by servo motor make filling precise and each nozzle can be adjusted individually.

Features:

1. Adopted lubricant oil pump for precise and smooth filling.
2. Servo motor controls each filling nozzle individually and makes filling precise.
3. Selected pneumatic shut off valve to prevent liquid from dripping down.
4. Pneumatic bottle positioning system and diving nozzle for precise filling.
5. Pneumatic drip tray with surplus oil backflow system.
6. Anti-bottle backup sensor ensures smooth transferring without jam.
7. Recipes for instantaneous changeover for different products can be stored as memory parameter.
8. Tank with product re-fill system and alarm for out of liquid.
9. Colorful touchscreen to set filling volume, speed and interval time of each nozzle and shown filling status.
10. Heavy duty and rigid construction: Made of stainless steel and high grade anodized aluminum.

Specification:

- Filling range: 50~5000ml
- Filling speed: 25~40 bottles/min
- Power supply: 220VAC, 50/60Hz
- Machine size: (L)5125mm (W)1528mm (H)2398mm

Option Accessories:

- Infeed / Outfeed turntable.
- Anti-dust protecting case.
