

Automatic Ice/Jelly Lolly Filling and Sealing Machine

The automatic ice or jelly lolly filling and sealing machine is designed for packaging fruit jelly, ice pop, as well as various liquids such as water, yogurt, and various different types of drinking.

Characteristics:

1. The machine can automatically complete sterilization, filling, heating, sealing, and unloading functions.
2. Mainly made of SS304 stainless steel, it is corrosion resistant and easy for cleaning, and offers high structural strength.
3. The automatic ice or jelly lolly filling and sealing machine offers accurate and filling and sealing process. The filling quantity is uniform.
4. It comes with automatic temperature control function to assure tight sealing.
5. With an optimized configuration, the equipment has reliable operation and is easy for control.

Technical parameters:

Packing speed:	4000PCS/hour
Filling capacity:	50G-200G
Filling head:	20
Machine material:	SS304
Dimension:	1300*650*1270MM
Power supply:	220V/50HZ
Power:	2.2KW
Weight:	200KG
