

KFW-300 Pillow Packing Machine

Applicable for packing various solid regular objects, such as moonquake, bread, biscuits, candies, snow cakes, custard cakes, chocolates, instant noodles, medicines, commodities, hardware, carton, trays and etc.

Technical Advantages:

- Programmed and controlled by servo motors, the working speed regulated individually and the wrap bags length adjustable to meet different needs;
- User friendly Touch Screen HMI guarantee the easy operation and multi-language display conversion; Simple to operate and adjust settings through graphic HMI
- High-precision photocell control tracking system to recognize products with different colors and guarantee the precise sealing and perfect printing
- Easy format changes for packaging various sized products using adjustable former and ensures high production;
- Built-in heated Sealing Roller improves the speed and sealing reliability, avoid melting the film and cost-saving of package material;
- Double film roll spindles with automatic film splicer.

Technical Parameter:

| Model | KFW-300 |
|---------------------|--|
| Film width | 80-300mm |
| Bag length | 60-400mm |
| Bag width | 35-100mm |
| Product height | 30-60mm |
| Film roll diameter | Max 350mm |
| Packaging speed | 80-350bag/min |
| Packaging materials | OPP,PVC,OPP/OPP,PT/PE,KOP/OPP,ALU-FILM |
| Power | Singe Phase, 220V,50HZ |
| Machine size | (L)1600×(W)1000×(H)600 |
| Total Power | 4.2 KW, Heating power: 2.1KW |
| Net Weight | 1000KG |
