

AS1000-200 Full Automatic Liquid Packing Machine

The equipment is widely used in milk, bean milk, various drink, soy sauce, vinegar and wine and so on various film packaging of liquid, ultraviolet radiation sterilization can automatic bag molding, filling, date printing, sealing, cutting one-time finish. The machine adopts stainless steel structure, international health standard. PLC control, photoelectric tracking, perfect design. The stable performance, easy operation, low fault rate. Get the praise of customers at home and abroad.

TECHNICAL SPECIFICATIONS:

Mode	AS1000 -200
Capacity	1500-2200bags/Hour
Volume	100ml-250ml ×2
Power	220V/380V 1.8kw
Firm width	180mm/320mm
Weight	450kg
Overall Dimension	1050×870×2100mm
