

Flow Packing Machine XZB-250

This flow wrapping machine is designed to unitize product packs as well as to individually package piece products in three seal bags ("Flow Pack"). This machine is suitable for irregular shape products as well as normal product.

Film goes from bottom, a provision to operate with a photo sensor that reads photo marks on a packaging film, feed film to the collar shape bag former from underneath.

The machine design makes it possible to package products having various shapes: parallelepiped, cube, cylinder, truncated cone and more complex bodies. Bags are made of heat sealed film in reels.

Machine cover is milk white color; product contact part is stainless steel.

The following products can be packaged:

1. Piece-product packaging: Bread, chocolate enrobed cheese bar, cards, popsicles, cookies, waffles, ice trowels, cotton wool, soap, etc.
2. Group packaging: Waffles, meat chops, bakery, soap, sponges, biscuit with tray etc.
3. Non standard products (customization) Individual spoon, fork, knives, also suit for packing spoon, fork, knife, napkin, toothpick, etc. all in one pack.

Specifications:

Model	XZB250
Max. film width	240mm
Packing speed	50–180 pack/min
Film thickness	0.03–0.06mm
Bag length	90–300 mm
Bag width	25-100mm
Product height	1–40 mm
Power supply	220v, 50/60 Hz, 2.4 KW, 1 Phase
Machine size (L * W * H)	4200 × 820 x 1265mm
Machine weight	680 Kg
