

## *Vertical Packing Machine BVL-series*

### **General Description**

1. Weighing accuracy 0.5 to 1.2gram.
2. Computer control and English-Chinese touch screen for easy operation without stopping the unit.
3. Intelligent temperature controller for easy adjustment and good application to various laminated film and paper.
4. Packaging diversification, such as pillow bag, gusseted bag, hole punched bag etc.
5. Full automation from bag forming, filling, sealing, cutting and date printing.
6. Multi-heads scale filling system for filling accuracy and good application to various kinds of products.

### **Features&Advantages**

#### *Servo Film Pulling System*

1. High Accuracy in bag length and positioning.
2. Smooth in Film Pulling
3. Lower Friction and operation noise

#### *Servo Horizontal Sealer*

1. Easy to adjust sealing pressure.
2. Suitable for various packaging material and bag type
3. High sealing strength without leakage.

**Technical Parameter:**

<b>BVL Series Vertical Form-Fill-Seal Machine for Large Pillow Bag Start from Laminated Film Material</b>				
<b>Mode No.</b>	<b>Pouch Size/mm</b>	<b>Max. Volume/mL</b>	<b>Max. Speed</b>	<b>Function</b>
BVL-420	80x80—200x300	1500	60,90 ppm	Pillow bag, gusset pillow bag, quad-seal box bag
BVL-520	80x100—250x350	2000	60,90 ppm	
BVL-620	100x100—300x400	3000	60,90 ppm	
BVL-420D	80x80—200x300	1500	120,180 ppm
