Features of Popcorn Packaging Machine for Sale:

O Mature technology. After more than 10 years of technical updates, our fully automatic popcorn packing machine is simple, scientific and reasonable, easy to operate and easy to clean. It takes only ten minutes to install and debug new equipment. One machine can automatically package a variety of products, and it takes only a few minutes to change the molding machine. It can adjust

the sealing and cutting position directly on the touch screen without stopping the machine.

Machine failures are automatically displayed on the computer's touch screen.

○ Stable performance. The electrical configuration of the popcorn packaging machine for sale is international and domestic well-known brand components, maybe the price is higher than others, but it can adapt to the high load of the workshop, the failure rate is very low, can help you improve production efficiency.

○ Beautiful appearance. The popcorn packaging machine can be welded horizontally, flawless, very flat and bright. The frame material is made of 304 stainless steel, and the chassis steel plate can reach 5-7 mm. The equipment is durable and the electrical box has a high degree of sealing and is moisture and water resistant.

○ Long service life, less wear parts, less wear and high configuration, and the service life can be at least 10 years. The service life is far more than the similar equipment in the market.

○ After-sales service. our after-sales installation, commissioning and maintenance technical team, mostly in the company for more than 5 years, their skilled and efficient work, can make the popcorn packing machine quickly resume production.
