

Automatic Bottle Filling Machine LXGF12-12-4

This Machine specially for 5L - 10L Big bottle drinking water, it integrates bottle washing, filling and capping into one unit. In order to achieve the purpose of washing and sterilizing, the washing machine uses multi washing liquid spray and thimerosal spray. This thimerosal can be circularly, the capping machine can cap barrel automatically, this line equips with water spraying device in order to ensure those caps sterilize and clean. It also can automatically carry out barrel, washing, sterilizing, filling, capping, counting and products discharging, with complete function, modern design and high degree of automation. It is a new kind of barreled water auto production line, which integrates mechanism, electricity and pneumatics technologies together.

Application:

Function: Rinsng / Filling / Capping System	
Suitable for: Big Bottle Water	Bottle sizes: 5L-10L
Filling system: Gravity Filling	Capacity: 1500 ~2000BPH
Application: Drinking water / Pure water / Mineral Water / Spring water	

Technical Data:

Model	LXGF12-12-4
Capacity: (5L)	1500 -2000 Bottles/hour
Filling heads	12 pcs
Suitable bottle volume	5L & 10L
Compressor air	0.4 ~0.6 Mpa
Filling type	Normal Pressure
Application	Drinking water / Mineral water / Pure water
Total power	4.5kw
Overall dimensions	3.2X2.0m
Height	2.3m
Weight	3000kg
