

## ***Automatic Capping machine NCW-310***

Automatic indexing spindle capper NCW-310 is the best choice for various bottles with small production. Capping height and speed are adjusted by hand wheel and speed knob easily, there is no complex parameter setting or interface. Capper will guide bottles and start capping right after caps placed by operator.

### **Features:**

1. Suits for all kinds of screw caps and pump dispenser.
2. Can be customized according to bottle size.
3. Bottle stopper system for precise positioning of any shape of bottle: round/oval shaped/square.
4. Capping height, torque, and speed are adjustable.
5. No bottle no capping.
6. Moveable design and can be connected with filler or counter to be an inline system.
7. Heavy duty top chain conveyor for stable conveying.

### **Specification:**

- Caps type: screw type
- Cap diameter: 22~60 mm
- Capping speed: around 30 bottles/min
- Air pressure requirement: 2~5 kg
- Power supply: 110v or 220v, single phase
