

Beef Sauce Filling and Capping Machine

Automatic beef sauce filling and capping machine is a new set of independent research and development of mechanical filling machine, this sauce filling machine is set of automatic filling and vacuum screwing cap in one. This machine is suitable for filling and vacuum screw capping various bottled chili sauce, mushroom sauce, sauce and so.

The filling machine and vacuum screw capping machine form an automatic sauce filling production line together. their combined functions is a perfect combination, they greatly reduce labor costs, reduce the area of the machine, saving the field.

Features:

The machine is mainly and specially designed for split packaging production of sauce type products on food industry.

The beef sauce filling and capping machine is suitable for filling packaging various seasoning with particles and concentration larger chili sauce, mushroom sauce, beef sauce, sesame paste, butter pot bottom material, viscous butter sauce pot bottom material, oil pot bottom material and other substances.

Technical Parameters:

Applicable spece	50~1000g
Production ability	1000-2500 bottles/hour
Filling error	acuties $\pm 2\%$ standard outfit quantity
Power	380/220v 50/60Hz
Electricity power	$\leq 1.2\text{Kw}$
Requirements compressed air pressure	0.4 ~ 0.6 Mpa
Speed control	frequency control
LAN noise	50dB acuties
Machine weight	about 600Kg
Machine dimension	2440 x 1200 x 1800 (mm)
