

SPW-12 Fully-Automatic Capping Machine

SPW-12 Fully-Automatic Capping Machine is very beautiful, decent and easy to operate. Applicable for different-size round, rectangular and most irregular bottles and containers without spare parts change over. Stainless steel SUS 304 main machine frame and housing. Large capacity floor level cap hopper to stock caps for long -time running without continual refilling. At the same time, it highly raises the production capability that far exceed all other kind of capping machines. Three groups of capping wheels to screw the caps properly and completely. The third group capping wheels which equips slipping piece to detect the caps screwed properly or not. The machine will pause automatically if the bottles are absent or choke in the conveyor belt. Rejection system for improperly capped bottles and/or missing foil caps. One conveyer for bottles transmission with speed variation. Compatible design allows for attaching a counting machine, a labeling machine and a cartoning machine to become a line-up. Meet GMP requirement.

Technical Parameters:

Model	SPW-12
Maximum Production Capacity	110 bottles/min
Cap Size	15-70 mm Diameter
Bottle Size	15-500 ml
Power	220V, 50Hz, 0.85 Kw
Packing Size	2400*800*2000 mm
Packing Weight	550 Kg
