

FFC-M Box Motion Packing Machine

FFC-M series packing machine are specially designed for assembly packing of several blocks. Adopt box motion packing style, This machine has more sealing time has more sealing pressure. This machine adopts film bottom sending to automatically wrap, form and seal, solve the problem of packing several blocks without tray, save film. Also we can design the film width 720mm or 820mm to satisfy the customer's requirement.

Packing material: Paper/PE OPP/PE, CPP/PE, OPP/OPP, OPP/AL/PE the other material which we tested suitable for packing.

Parameter:

Packing rate	30-120 bags/min (upon products packed)
Film width	Max 590mm (customerized machine accepted, 680 720 820mm)
Bag length	70-450mm
Pack size	Width 20-250mm, Height 5-180mm (upon products packed)
Weight	1200KG
Voltage	220V
Power	Packing machine 3.6kw/shrink tunnel 15kw
Size	5700*1200*1700
Applicable Film	OPP/PE, PT/PE, AL/PE, PAPER/PE, PE
