

OC-250HS/OC-350HS Disposable Honey Spoon Packing Machine

This liquid flinging machine is specially designed for making honey spoons, and molds of corresponding sizes can be customized according to customer needs.

Machine workflow:

1. Touch screen: set the parameters on the screen, such as filling weight, speed, etc.
2. Place the material holding container: feeder can automatic filling the spoon on the mould.
3. Heating and stirring hopper: pour the honey into the hopper, and automatically heat and stir for easy filling.
4. Finished product output: putting aluminum foils on spoon, production completed.

Specification:

| Model | OC-250HS | OC-350HS |
|----------------|----------------------|----------------------|
| Packing speed | 800-1000pieces/hour | 1600-2000pieces/hour |
| Filling volume | 1-20g | |
| Machine power | 220V/380V, 50HZ, 4KW | |
| Machine size | 1217*1015*1343mm | 1250*1250*1650mm |
| Machine weight | 250kg | 280kg |
