

ZX-05 Drop Case Packing Machine

This machine has a wide range of applications, a small footprint, and can be used as a stand-alone machine. It is suitable for on-line use of automatic cartoning machines and filling machines for various specifications of bottles, pots, and barrels to complete the subsequent packaging production line. This machine can automatically arrange the products and pack them into the boxes according to the requirements of the product packing quantity. The full boxes of products are automatically sent to the conveyor roller and automatically connected to the unmanned production line. This machine is widely used in medicine, food, oil, daily chemical and other light industry industries.

Technical Parameter

Machine model	ZX-05
Power supply/power	220V/380V 50/60HZ 1KW
Applicable Products	Various plastic buckets, plastic pots, plastic bottles
Packing speed	5 -10 boxes/minute
Packing method	2*2, 2*3, 2*4
Use air source	6-7kg
Machine size	1600*1500*1850mm (L*W*H)
