

Automatic Bottle Machine LP

Purpose and brief

This machine is used for pharmaceutical, health care products factory of plastic round bottles, square bottles shaped or orderly finishing equipment. No matter what kind of state of the bottle, the machine can automatically complete the bottle, Bottle, flip, and organize, clean, straight listed bottles, packaging equipment and after-convergence. The machine uses high-quality stainless steel or non-toxic and pollution-free engineering plastic manufacturing of mechanical drive technology, by adjusting the machine parts to meet the different bottles on a single machine to achieve common, with stepless speed, simple operation, automation high benefits. In the machine as a production line with the host

Main technique parameters

Production capacity: 60 ~ 240 bottles / min
Suitable bottle: plastic (round, shaped, square) bottle
Power: 380V 50Hz
Power: 0.8kw
Compressed air: 0.3 ~ 0.5MPa
Dimensions: 2750 × 1550 × 1450mm
