

Small Bottle Unscrambler YQLP-120

This machine is used in pharmaceutical factory, health care products, the suitable bottles include round bottles, special shaped bottles. This machine can lose bottles automatically, unscramble bottle. This machine adopts the high quality stainless steel or non-toxic pollution-free engineering plastic manufacturing, application of mechanical transmission technology, through the simple adjustment, can apply various bottle type, have a high degree of automation, the advantage is save labor. The machine can be used as the host or connect with the production line.

Technical Parameters:

- Production speed:60-120bottles/min
- Voltage:AC220/50Hz Power :0.2kw
- Weight:220kg
- Machine dimension:2000mm×1000mm×1200mm(L×W×H)
