ZS-XG16 Pneumatic Automatic Bottle Capping Machine

- Intelligent operation panel and is with English version, can control working time and set working mode.
- With Stop button, can protect the machine from damage and keep the operator safe during working.
- The suitable transfer speed is set previously, but customer can adjust it if they need to do this.

- Suitable for different kinds of bottle caps. The capping time, pressing time can be adjusted by operation panel.
- This screw can be used for loosening or tightening the capping chuck as customers 'need.
- Can detect the bottle once you the bottle pass through, save a lot of time and help you improve working efficiency. The sensitivity of the electric eye can be adjusted.

Technical Parameters:

- Working voltage:AC220V/110V 50-60HZ
- Bottle height:30-300mm
- Cap Diameter:18-70mm
- Bottle Diameter:20-160mm
- Working speed:20-60 bottles / minute (depending on bottle and cap size and shape)
- Working pressure:0.4-0.6MPa
- Dimension: About 1930x740x1600mm
- Packing size: About 2000x820x1760mm
- Machine weight: About 150kg
