

DTG-40 Semi Auto Aluminum Tube Filling and Sealing Machine

DTG-40 semi auto aluminum tube filling and sealing machine is specially design to fill all kinds of liquids and creams to metal tube and seal the tail. It is mainly used in pharmacy, chemical and adhesive industries, such as ointment, shoe polish, paintings, silicon glue and ab glue ect.

Features

- PLC and touch screen controlled.
- Full functions of eye-mark, filling, tail folding coding and auto exit.
- Several sealing style is optional.
- One machine can be used for different sizes of tubes and capacity with customized moulds.

Technical Parameters:

Power	220V50Hz
Rate	1.5KW
Air Source	0.6-0.8Mpa
Tube dia	Φ13mm~Φ50mm
Tube Length	50mm~250mm
Filling Range	2g~200g
Filling Speed	30pcs-60pcs/min
Filling precision	±1%
Measure	1380×1170×1900mm
Weight	320kg
