

## *ZX-F-FK Valve Pocket Quantitative Packing Scale Powder Filling Machine (Double Head)*

### **Introduction**

- This machine is suitable for quantitative weighing and filling of all kinds of powder and fine granule material in valve pocket
- Double helix, double position blanking, the efficiency than the traditional valve pocket packaging machine twice
- Horizontal screw feeding, electronic scale weighing and measuring
- Servo motor drive, fast, medium, slow three feeding
- Warehouse with mixing system to prevent material bridging
- Closed filling, no dust flying
- Can be equipped with automatic feeding device
- All kinds of connections adopt quick installation structure, easy to disassemble and clean

**Technical Parameters:**

Packing specification	500g-50Kg
Packaging speed	120-900bags/hour
Packaging Accuracy	$\leq \pm 0.3\%$
Voltage	AC380V 50/60Hz
Power	3Kw
Machine weight	300Kg
Machine size	800*1250*1800mm
